

# Imf Direction Of Trade Database

World Development Indicators (WDI) is the primary source for the World Bank's data on economic, social, and environmental indicators. It provides a comprehensive set of data for over 200 countries and territories, covering a wide range of indicators including income, employment, health, education, and the environment. The data is updated annually and is available in a variety of formats, including spreadsheets, databases, and APIs. For more information, visit [data.worldbank.org](http://data.worldbank.org).
